RECENT EXPERIENCE

Opal Labs, PDX — Technical Project Manager
Feb 2021 - Present

Maintaining smooth process frameworks while evolving steps to balance the needs and challenges of an organization pushing for growth.

- Successfully managed 9-12 projects within any given sprint adhering to Agile principles.
- Identified engineering pain points, pitched, reorganized, and transitioned the engineering team from a sizeable 15-member group to 2 pods to improve communication, scale development, and improve Scrum/Agile processes.
- Improved forecasting and project resourcing by introducing Monte Carlo simulation forecasting to generate early-stage project timelines using historical developer throughput.
- Increased the accuracy of project completion forecasting by creating a sprint point forecasting model to help teams effectively commit to points, keep morale high, and accurately hit end dates.
- Created and scaled cross-functional processes for new integrations across Engineering, Product, GTM, and Customer stakeholders. Essentially, organized internal feature demos, customer onboarding email and information collection templates, project intake processes, and customer testing steps.
